

# Zinc Oxide-Ointment-Spray

MeproVet

Skin protection ointment for spraying

For animals

## Content

Spray solution 79 g

Blowing agent 61 g

100 g spray solution includes:

Zinc oxide 18 g

Lanolin 2 g

Allantoin 500 mg

## Field of application

Zinc oxide-Ointment-Spray is used as a skin protection ointment.

The active ingredient dries and forms an air-permeable protective film. The skin is protected against wound secretion, sweat, urine, water and other harmful influences.

Also suitable for covering the surrounding skin areas of fistulas and as skin protection before applying plaster casts.

## Instructions for use

Spray from a distance of 10 to 20 cm onto clean and dry skin.

Smooth out skin wrinkles beforehand.

Shake vigorously before use!

## Hazard and precautionary statements

Extremely flammable aerosol.

Pressurised container: May burst if heated.

Causes skin irritation.

May cause drowsiness and dizziness.

Toxic to aquatic life with long lasting effects.

Keep away from heat, hot surfaces, sparks, open flames and other ignition source.

No smoking.

Do not spray on an open flame or other ignition source.

Do not pierce or burn, even after use.

Avoid release to the environment.

Use only outdoors or in well-ventilated area.

Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

Inadequate ventilation and/or use can lead to the formation of explosive gases/  
highly flammable mixtures possible.
